INTRODUCTION

The *Quarterly Cumulative Index Medicus* ceased publication with Volume 60, July-December 1956. The medical literature of 1957-1959 was covered by the *Current List of Medical* Literature. Beginning January 1960, both publications were superseded by the monthly *Index Medicus*, published by the National Library of Medicine, and the *Cumulated Index Medicus*, published annually by the American Medical Association.

The *Cumulative Index Medicus* is a merging into one alphabet of the material which appeared in the twelve monthly issues of the Index Medicus (125,000 articles in 1960, 140,000 articles in the present issue); the format remains the same. The *Cumulated Index Medicus* is arranged in two sections, Subject and Author. Complete unit citation entries are printed within each section. In the Author Section, however, the unit citation appears only under the senior or single author with all secondary authors' names referring to the full reference under the senior author. The complete entry normally includes the names of all authors cited in the Journal; the title of the article, either in the original English or in translation (enclosed within brackets); the journal title abbreviation; the volume number; inclusive pagination; date of issue, and an abbreviation denoting the original language of the article if other than English. A list of the foreign language abbreviations follows:

Af	Afrikaans	Heb	Hebrew
Ar	Arabic	Hun	Hungarian
Bul	Bulgarian	Ic	Icelandic
Ch	Chinese	In	Indonesian
Cz	Czech	It	Italian
Dan	Danish	Jap	Japanese
Dut	Dutch	Nor	Norwegian
Fin	Finnish	Per	Persian
Fr	French	Pol	Polish
Ger	German	Por	Portuguese
Gr	Greek	Push	Pushtu
Rum	Rumanian	Sw	Swedish
Rus	Russian	Th	Thai
Ser	Serbo-Crotian	Tur	Turkish
Sl	Slovene	Uk	Ukranian
Sp	Spanish	Viet	Vietnamese

Under each appropriate subject heading and subheading, the complete entry is arranged in approximate alphabetical order merely by the first letter of the senior author's surname. The entry (without heading and subheading) appears exactly the same way in the Author Section, located in strict alphabetic order according to its senior author's name. The typical junior author cross reference appears as follows:

Gaudier B see BRETON A

Articles about an individual are listed in the Subject Section under the headings BIOGRAPHIES, OBITUARIES, and FAMOUS PERSONS. Entries are listed under the headings BIOGRAPHIES and OBITUARIES alphabetically by the subject of the article rather than by the author.

Journal title abbreviations are derived (with minor deviations) from the *World List of Scientific Periodicals* and *World Medical Periodicals*. Capital letters only, however, are used at the beginning of every member of the abbreviation; punctuation is also eliminated. A complete key to the journal title abbreviations used in the *Cumulated Index Medicus* is provided—one arranged alphabetically by the abbreviation, the other by the full journal title.

Subject Headings

The entries in the Subject Section are arranged under subject headings representing the main concepts of medicine and its ancillary fields. The strictly controlled system of headings, along with cross references used, has been separately published by the National Library of Medicine under the title *Medical Subject Headings* (1960), and is available from the U. S. Government Printing Office, Washington 25, D. C., at $2.25 per copy.
